

# Web 2.0 Tools: A videoconference workshop

## They Just Might Make Your Job Easier

### Professional Development for Middle and High School Teachers

If you have no idea what a tweet, ning, or jott might be—or why you should care—this is the workshop for you! Michelle Brenner, from the humanities department at the North Carolina School of Science and Math, is a self-proclaimed and self-taught computer geek. She has sorted through the amazing amount of new interactive websites out there, come up with the good, the bad and the ugly and developed ways to get your classroom organized and your students engaged.

This 12 hour workshop via videoconference is designed for teachers with an interest in making the computers in their classrooms or labs, those cell phones that won't stop ringing and the ubiquitous iPods do what they were originally intended to do: make our lives easier and more fun.

She will teach participants the technologies (such as Ning, Yugma, Wikis, and blogs), techniques for classroom integration and incorporation of mobile technologies such as cell phones and iPods, and discuss copyright and privacy concerns when developing lessons which utilize online components.

#### Computers and Technology Standard Course of Study: Objective 3.03 and 3.04

- Select and use technological tools for class assignments, projects, and presentations.
- Adhere to Fair Use and Multimedia Copyright Guidelines, citing sources of copyrighted materials in papers, projects, and multimedia presentations.

This workshop  
FREE of CHARGE!

#### Pre-requisites for teacher participants:

Comfort in basic computer skills such as email and word processing, access to laptop computers or computer labs preferred. Internet access to the following: Ning.com, Yugma.com, Pbwiki.com, Edublogs.org.

#### Time permitting:

Voicethread.com, Gcast.com, Audacity.sourceforge.net

**1.5 CEUs: 12 hours of in-class time plus  
6 hours of homework**

**Dates: Dec. 2, 4, 9, 11, 16, 18**

**Time: 3:30 - 5:30pm**

**To schedule a site contact:**
